GLUE DIRECT INSTALLATION			DOUBLE-GLUE INSTALLATION		
<i>NOTE:</i> To install 100 s/y of carpet -7.69 gallons of adhesive are required at an average cost of \$5.70 per gallon. Using the recommended 3/32" V-notch trowel, 13 s/y per gallon will be installed.			<i>NOTE:</i> To install 100 s/y of cushion to floor , 2 1/2 gallons of pressure-sensitive adhesive are required at an average cost of \$23.60 per gallon. Using the recommended 1/16" V-notch trowel, 20 s/y per gallon will be installed.		
VERY IMPORTANT!					
The cost of materials must be figured accurately AND added to the time required to install the flooring plus the wages and additional operational costs BEFORE an accurate installation cost can be quoted. All costs will vary according to manufacturer, type of carpet and substrate.			<i>NOTE:</i> To install 100s/y of carpet to cushion , 14 1/4 gallons of adhesive are required at a cost of \$7.23 per gallon. Using the recommended 1/8" x 1/8" x 1/16" U-notched trowel and the full adhesive strength, 5 s/y per gallon will be installed.
